Capnography: Monitor, measure and improve Part 1: Review and respiratory

What?

Zoom webinar

Featuring

Chris Kroboth, MS, NRP, FP-C
Clinical Education Manager, iSimulate

When?

November 30, 2022
1 p.m. - 2 p.m. ET/10 a.m. - 11 a.m. PT

Why?

Join us while we explore a simulation-based approach to end-tidal capnography (EtCO₂). Identify the ventilation status and treatment of a non-intubated patient and refresh capnography basics with various scenarios to learn how EtCO₂ correlates to a patient's respiratory status, stability and overall treatment.

Objectives:

- Obtain a basic understanding of the ability of EtCO₂ to aide in the understanding of the patient's ventilation status.
- Obtain a basic understanding of how EtCO₂ works and should be considered a key diagnostic monitoring tool.
