

# AT THE HEART OF THE MATTER

## Emergency Cardiac Care

### PREREQUISITE 4-HOUR MEDICLEARN MODULE

The first half of your Fall 2023 CME is a 4-hour online module that launches in MedicLEARN on **October 11, 2023**. The content of the MedicLEARN Fall 2023 CME module discusses theory, physiology, research, and considerations for several cardiac emergencies.

- Medical cardiac arrest management
- Bradycardia with a focus on transcutaneous pacing
- Tachycardia with a focus on synchronized cardioversion
- STEMI and sex biases
- Left Ventricular Assist Device (LVAD)

### SCHEDULED 4-HOUR CLASSROOM SESSIONS

Participating paramedics will have an opportunity to come into class with an RPPEO Facilitator to practise and discuss emergency cardiac care. The RPPEO is working with your paramedic service to offer convenient, scheduled class time to you. For more information on when you will be scheduled for your four hours in class, please refer to your paramedic service.

- skills stations
- case studies
- practise scenarios
